Graphic layout: Kosin Kaewsing

Our Vision

Nature is back; with a little support from all of us, it can heal itself.

In the name of progress, people have polluted the environment with industrial wastes, spilt oil into the oceans, dumped garbage into agricultural lands, pumped millions of pollutants into the air, thrown plastic in our surroundings and hunted wildlife to the brink of extinction.

However, with the lockdowns, Earth has shown itself to be very resilient and buoyant; we can breathe the clean air due to reduced traffic, see fishes returning to rivers, hear birds chirping in their natural migration habitats and enjoy trees growing greener. We can see nature in sync and harmonize with our living, if we learn to co-exist.

At Panel Plus®, our vision is to develop products that are naturally sustainable, curtail deforestation, reduce and recycle waste. We endeavor to achieve this by improving our products, creating value from recycled materials, extending life span of products and ensuring strict procedures that eliminate air pollution during production.

Panel Plus® operation is awarded with certifications to prove our continuously improvement on quality and care for surroundings. By partnering with Panel Plus®, everyone can be assured of partnering with nature in everyone's shelters, workplaces, and support nature in healing itself back to **UTOPIA**.

Wood Collection

Earth is our home and we have to respect it, as it provides all the resources necessary to facilitate bountiful & beautiful life for us and for our future generations to come.

With the expanding deforestation, uncontrolled wildfires and pandemic viruses spreading, nature is sending us a strong sign that we cannot continue on our journey unabated without consequences.

Panel Plus® has envisioned a future and made it a reality, where we can derive the same texture, aesthetics and feel of natural wood without causing harm to forests & trees, and do it in a sustainable manner, whilst meeting internationally recognized standards & parameters.

The “GreenGuard” certification on Panel Plus® laminates assures the conscious customers of their contribution to conserving nature and reducing air pollution.

Pattern Collection

By nature, our minds have evolved to notice patterns and designs in our world; these patterns bring balance and equilibrium in our lives, and motivate us to create stimulating decorations around us.

Panel Plus® fashions its design offering with intricate & exquisite patterns that enhance the flow of interior decorations, including on canvas bases like fabrics, metals & aluminum, which opens up infinite options & combinations to encompass each & everyone's dreams into reality.

Stone Collection

Nature is the perfect recycler of life; where humans, animals, earth, air, trees & plants can continuously co-exist in harmony and sustainably in sync.

Our need to be with nature extends to bringing nature into our homes, by using materials like Marble, Granite & Slate to decorate our interiors.

Panel Plus® has innovated its designs and processes to authenticate the beauty of natural stone art into its products, without the need for unnecessary mining which causes harm to nature, air and human life.

Panel Plus® products offer the most lifelike & realistic ambience of marble, granite & slate, whilst guaranteeing that Earth's natural reserves have been protected.

Solid Color

Earth is filled with delightful colors, which bring life to our surroundings and reduces the dull atmosphere from our lives.

Naturally, we like to live surrounded by an array of beautiful colors & tones, which have a soothing and relaxing effect on our minds and bodies.

Panel Plus® has brought forth a wide range of rich & natural colors for you to choose, with a diverse range of finishes to match your design taste & moods.

Panel Plus® Palette encompasses the stylish & trending colors, hand selected from the leading furniture & designers globally, to rejuvenate your interiors.

Solid Color

Panel Plus Laminate

is crafted to deliver absolute interior design works. Our materials are manufactured with cutting-edge innovations that have strength with resistance to scratch and heat and also environmentally friendly for users.

Panel Plus Laminate consists of cellulose webbings which are impregnated with hardenable synthetic resins and pressed together by means of heat and high pressure.

EN-438 STANDARD

is our certificate to ensure that quality of product meet the performance specifications including resistant to impact, scratching and abrasion, resistant to heat and light, resistant to water steam and chemicals. In addition, it is easy to clean disinfect, safe for all users.

Indoor Air Quality

Moreover, Panel Plus® exceeds the industry's highest standards for Indoor Air Quality, with GREENGUARD Certification to reduce harmful chemical emissions on Panel Plus® laminates. Resin systems and raw material supply is aligned with the use of low emitting materials.

FLAME RETARDANT

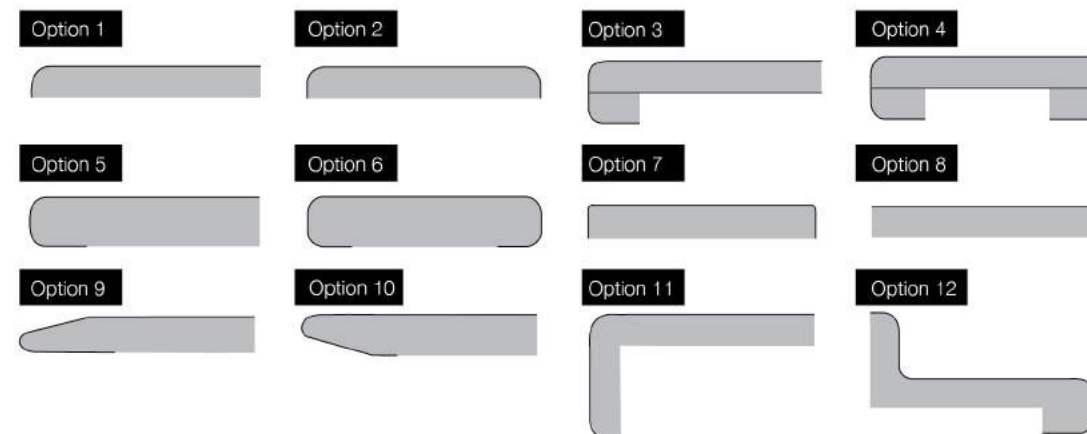

Panel Plus® HPL is composed of special elements that can slow the spread of flame and combustion, making its an excellent choice as a safety material and suitable for various environments and application.

ANTIBACTERIAL

The product has been tested against the leading standard JIS Z2801 as it is capable of reducing the growth of bacteria on a surface by up to 99.99%, providing a safe and more hygienic surface.

Components

Panel Plus® HPL can be applied to wooden materials such as particleboard, MDF, plywood, etc. It can be made up to any requirements e.g. with open edge, edged, or seamlessly postformed.

Melamine Face Panels (MFC)

Panel Plus® offers a finest solution for interior application ranging from cabinet, countertop, kitchen top, office furniture and many more; using the latest German technology to enhance product quality and environmentally friendly. The product composed by coating particleboard or MDF with high quality decorative paper impregnated with thermosetting resin on both sides of the board which result in stain resistance, scratch resistance and general wear surface. There are over 100 designs available which can be coordinated with Panel Plus® HPL.

Our Melamine Faced Panels care for people's health, and introduced "Air Safety Glue Technology" to the chipboard which virtually eliminates the release of Formaldehyde emissions in compliance with European Standards for indoor applications and use.

E1

Formaldehyde emission level less than 1.5 mg/liter

E0

Formaldehyde emission level less than 0.5 mg/liter

SE0

Formaldehyde emission level less than 0.3 mg/liter

CARB P2 / EPA

Formaldehyde emission level less than 0.11 ppm

MAINTENANCE

- Use a damp cloth or sponge with a mild soap or a general-purpose cleaner to remove stains.
- Certain food stains such as coffee, tea, fruit drink can be removed with using a mild cleaner is recommended for removing stains.
- Stubborn stains that resist any of the above cleaning methods may require the use of a cotton ball saturated with bleach or nail polish remover (acetone), gently rub the stain for up to two minutes. Rinse thoroughly with warm water and wipe dry using a soft cloth.

CAUTIONS

- Do not use sharp objects such as abrasive pad or steel wool or knives on the laminate surface.
- Do not chop, slice directly on the laminate surface.
- Do not place hot cookware directly on the laminate surface.
- Do not let water through the joints, it may cause the laminate to separate from substrate.
